

Decarbonize Iowa City

Iowa City's GHG Emissions by Year

Free Home Energy Audits

Save money, year after year

Residents can receive an average of \$10,600 in incentives to electrify their household under the Inflation Reduction Act (IRA). Tax credits have an annual cap (\$1,200 for home improvements and \$2,000 for some appliances), so the framework below can help maximize your financial benefits.

Do this Year		Date Completed
Get a home energy audit	Free from Green Iowa AmeriCorps, a \$400 value! Johnson Co. residents call 319-339-5399 to schedule.	
Do in the next 2-3 years		
Improve insulation, air sealing, and ventilation in your home	Up to \$1,200 federal tax credit and \$1,600 HEEHRA/HOMES rebate	
Upgrade when it breaks		
Replace air conditioner with heat pump	Up to \$2,000 federal tax credit and \$8,000 HEEHRA/HOMES rebate	
Replace water heater with heat pump water heater	Up to \$2,000 federal tax credit and \$1,750 HEEHRA/HOMES rebate	
Bonus: Upgrade electric panel	Up to \$600 federal tax credit and \$4,000 HEEHRA/HOMES rebate, when combined with a heat pump HVAC system or heat pump water heater	
Replace your current car with an electric vehicle (EV)	Up to \$7,500 tax credit (new EV) Up to \$4,000 tax credit (used EV)	
Do in 5-10 years		
Replace drafty windows	Up to \$600 federal tax credit and \$1,600 HEEHRA/HOMES rebate	
Replace thin exterior doors	Up to \$500 federal tax credit and \$1,600 HEEHRA/HOMES rebate	
By December 2031, when rebates and credits are set to expire		
Home renewable energy system	30% uncapped tax credit for rooftop solar array 30% uncapped tax credit for battery storage

Insulation Grants

Want to lower your heating costs and fight climate change?

Check your attic!

If you can see the floor joists in your attic, you likely need more insulation. Learn more at:

icgov.org/Insulate

“EE8” Whole Home Electrification Grant

No cost electrification and energy efficiency upgrades to single-family and duplex rental housing.

Participating landlords agree to accept Housing Choice Vouchers at the residence for five years.

Eligible property improvements include:

- Attic insulation, with air sealing and ventilation
- New exterior doors and windows
- Air source heat pump water heater
- Air source heat pump HVAC
- Electric stove or induction range
- Electrical service panel upgrade

NEW Energy Efficiency Pilot Program
Up to \$25,000

TIF Energy Efficiency Grants

Matching grants for energy efficiency improvements for commercial and industrial properties located in eligible urban renewal areas.

Eligible projects include:

- Advanced heating and cooling systems
- Lighting system upgrades
- Building automation controls
- Solar power & water heating systems
- Insulation, high performance glass, cool roofs

Climate Action Grants offer additional funding opportunities
